

## **Section 1.2 Institutional Characteristics**

### Demographic Profile

Table 2 describes the percent of Limited English Proficient (LEP) students, free lunch recipients, and ethnic group percentages for each of the district feeder high schools. The percent of students who qualify for the free/reduced lunch program was also included as an estimate of the student's family income level. In addition, the total school enrollment for fall 2000 is provided. As can be seen in Table 2, the size of the district feeders in terms of student enrollment varied from as low as 308 students at Muir to 2,895 students at Morse. The average student enrollment for the district feeders was 1,687 students. The average percent of students who are LEP was 17% and the average percent of free lunch recipients was 52%. In terms of ethnic composition, on average, the district feeders were 34% Latino, 29% white, 18% African American, 11% Asian, 7% Filipino, and 1% American Indian.

The data in Table 3 show that the average student enrollment for the non-district feeders was 2,529 students, which was higher than the district feeder average. In addition, the average percent of LEP students (14%) and free lunch recipients (28%) was less than that of the district feeder high schools. However, similar to the district feeders, Latinos (42%) and whites (40%), on average, were the two largest ethnic groups.

### Academic Profile

Tables 4 and 5 show the API base index and the percent of 10<sup>th</sup> graders passing the California High School Exit Exam (CAHSEE)<sup>1</sup> for each high school feeder. As shown in Table 4, the average API base index for the district feeders was 625. Of the 10<sup>th</sup> graders who tested on the CAHSEE, an average of 27% passed mathematics and 42% passed English language arts. In comparison to the district feeders, the average API base index for the non-district feeders (see Table 5) was slightly higher (655), as was the average percentage of 10<sup>th</sup> graders passing the mathematics (37%) and English language arts (55%) components of the CAHSEE.

---

<sup>1</sup> The CAHSEE is initially given to students in the 10<sup>th</sup> grade. Although students are able to retake the examination during 11<sup>th</sup> and 12<sup>th</sup> grade, the CAHSEE pass rates in this report are based only on 10<sup>th</sup> graders who took the exam in 2001-02.
