

Section 1.3 Senior Class Characteristics

Demographic Profile

Gender and ethnic group percentages of high school seniors are listed in Tables 6 (district feeders) and 7 (non-district feeders). As can be seen in Table 6, the average senior class size among the district feeders was 324 students. In addition, the average percent of females to males was generally even. In terms of ethnic composition, on average, high school seniors from the district feeders were 33% white, 27% Latino, 14% African America, 14% Asian, 11% Filipino, and 1% American Indian.

The data in Table 7 show that the average senior class enrollment for the non-district feeders was 552 students, significantly higher than the district feeder average. However, similar to the district feeders, females and males were equally proportionate and whites (43%) and Latinos (38%), on average, were the two largest ethnic groups.

Academic Profile

Tables 8 and 9 show the percent of the senior class that: (1) graduated from high school and (2) completed all A-G requirements. In addition, of the students who took the Scholastic Aptitude Test (SAT) in 2001-02, the average verbal, math and total scores are presented. As shown in Table 8, on average, 93% of the senior class from the district feeders successfully graduated from high school. In addition, 40% of the district feeder seniors had completed their A-G requirements, while the average SAT verbal, math, and total scores were 461, 481, and 942 respectively. Similar to the district feeders, the data in Table 9 show that 93% of the seniors from the non-district feeder schools successfully graduated from high school, and 39% percent had completed their A-G requirements. However, non-district feeder seniors had higher average SAT scores: 479 (verbal), 502 (math), and 981 (total).

Note 1: Source - California Department of Education. **NA** indicates data were not reported.

Note 2: A to G completers are defined as students who complete a defined set of courses required for UC admission.

Note 3: API (Academic Performance Index) is a single measure indicating how schools perform relative to other schools statewide.

Note 4: The "Senior Class" column does not include students who enrolled during the year, thus the number of graduates may be higher than the number of actual seniors.
